

Dear Valued Patients,

As Coronavirus (COVID-19) has become the predominant concern across the globe, we want to take a moment to reach out and remind our community that the well-being and health of our patients and staff remains our top priority. As the situation evolves, the Senior Leaders of CommuniCare Health Centers remain resilient to uphold top healthcare standards when it comes to cleanliness and sanitation practices at our clinics.

As more cases of COVID-19 are diagnosed across the country, and here in Texas, we are now taking additional measures to mitigate the community spread. We are taking the following actions in an effort to emphasize our highest priorities, which is sustaining the health of our community.

We have increased the frequency of cleaning protocols and safety precautions to ensure a safe and clean space for our patients and staff. The means additional daily cleaning and a disinfecting program for frequently touched surfaces such as counter-tops, door handles, elevator buttons, and exam and procedure rooms. We have hand sanitizers located in all of our clinics for both patients and staff and are increasing our hand washing regimen, along with asking our staff members to stay home if they feel ill.

We will continue to closely monitor the directives and guidelines from local and national health organizations. Thank you for your continued trust in allowing us to care for your health needs. Our goal is to ensure you remain confident in the care we provide to you during these challenging circumstances and know that your health is a priority in everything that we do. We are confident that all our clinics are safe and will continue to operate as normal.

Sincerely,
CommuniCare Health Centers Senior Leaders
